FROM YEAR TO YEAR RANKING OF SCHOOL SUCCESS WITH MULTI CRITERIA DECISION MAKING

FERIDE TUĞRUL, BEYHAN YILMAZ, AND MEHMET ÇİTİL

ABSTRACT

In this study; success ranking of schools has been researched in multi criteria decision making. The aim of this study is to proposed an application of multi criteria decision making in intuitionistic fuzzy sets. Also from year to year ranking of school success has been determined with multi criteria decision making. Annual change of success of each school has been investigated. For this paper have been benefited from similarity measure for intuitionistic fuzzy sets in multi criteria decision making problem. By using this application, it is obtained very beneficial results in education, decision making and preference.
