## DOUBLE DEFERRED $f$ -STATISTICAL CONVERGENCE OF ORDER $\alpha$

Ş. SEZGEK AND İ. DAĞADUR

### ABSTRACT

In this study, we define the concept of double deferred  $f$ -density of order  $\alpha$  that is a generalization of  $f$ -density, where  $f$  is an unbounded modulus. We examine some similarities and differences between the concept of double deferred  $f$ -density of order  $\alpha$  and the well-known notions. Also, we define the double deferred  $f$ -statistical convergence of order  $\alpha$  for any double sequence and double deferred Cesàro summability with respect to modulus of order  $\alpha$ . Moreover, we have investigated the relationship between the two concepts and give some characterizations.
